

Minutes of Meeting: Project Progress Review

April 17, 2026

Location: Online / Hyderabad

Attendees:

- Teja Vardhan Podipireddy (Client / Mentor)
- Tanush Garg
- Aditya Singh
- Avnish Uba
- Rishabh Goyal
- Sashi Kumar Gudipati

Meeting Summary:

- **Initial Setup:** Tanush informed that the team was starting the application server and requested a few minutes before beginning the final demo.
- **Doctor Dashboard Demonstration:** Avnish introduced the doctor dashboard, which was demonstrated by Rishabh. Key features shown:
 - Alert system
 - Viewing patient reports
 - Navigation through the dashboard interface
- **Client Query:** Teja asked whether doctors can write their own comments.
 - Response: Feature not currently implemented.
 - Feedback: Client acknowledged and appreciated the dashboard.
- **Application Demo:** Tanush presented the main application and demonstrated:
 - Report upload functionality
 - Weather data integration
 - User alerts system

- Wearable data integration using Health Connect
- **Data Source Clarification:** Upon inquiry, Tanush clarified that the displayed data was from a personal Mi Band device.
- **AI Chat Feature:**
 - Demonstrated by querying about blood sugar.
 - AI provided a detailed response.
 - Client appreciated the clarity and explanation.
- **Voice Interaction:**
 - Tanush demonstrated voice input via microphone.
 - AI processed the query and responded using Text-to-Speech (TTS).
 - Avnish explained that Android native TTS and STT are used to minimize latency.
- **Client Feedback:** Teja appreciated the familiar voice interface and overall experience.
- **Live Chat Discussion:**
 - Client inquired about live chat capability.
 - Avnish requested clarification.
 - Client agreed to share a reference link and mentioned current system is already satisfactory.
- **Latency Discussion:**
 - Avnish explained latency is primarily due to the Gemini model.
 - STT and TTS are optimized using native Android APIs.
- **Model Optimization Query:**
 - Client suggested switching to a faster model (Flash).
 - Avnish explained trade-offs:
 - * Faster models may reduce precision
 - * Risk of hallucination in medical context
 - Decision: Continue with current model for accuracy.
- **Final Feedback:** Client expressed strong satisfaction:

“This is very nice, great job. I can’t wait to use it.”
- **R2 Presentation Discussion:**
 - Date: April 22
 - Time: 3 PM
 - Mode: Offline preferred
- **Client Response:**

- Will try to attend offline
- Will attend online if schedule does not permit
- Will confirm by next day

- **Closing Remarks:**

- Team requested client presence for first-user experience
- Client expressed excitement and willingness to attend

Action Items:

- Client to confirm attendance for R2 presentation
- Client to share reference for live chat feature (if applicable)
